

Quiz on PL/SQL Data Types

1. What does PL/SQL stand for?

- A.** Procedural Language/SQL
- B.** Programming Language/SQL
- C.** Process Language/SQL
- D.** Performance Language/SQL

2. Which of the following is NOT a PL/SQL data type?

- A.** VARCHAR2
- B.** NUMBER
- C.** BOOLEAN
- D.** CHARACTER

Answer (D): CHARACTER

CHARACTER is not a standard PL/SQL data type; instead, CHAR or VARCHAR2 are used.

The screenshot shows an Excel spreadsheet with a table of products and a formula being entered. The table has columns for Product ID, Product Name, Category, Price, and Stock. The formula bar shows the start of an XLOOKUP function.

Product ID	Product Name	Category	Price	Stock
P001	Laptop	Electronics	\$50,000	15
P002	Smartphone	Electronics	\$20,000	30
P003	Blender	Kitchen	\$5,000	50
P004	Refrigerator	Appliances	\$35,000	10
P005	Microwave	Kitchen	\$10,000	20

Product ID: P004
Price: =XLOOKUP(

3. What is the maximum length for a VARCHAR2 data type in PL/SQL?

- A. 255 bytes
- B. 32767 bytes
- C. 4000 bytes
- D. 10000 bytes

Answer (B): 32767 bytes

The maximum length for a VARCHAR2 data type can be up to 32767 bytes in PL/SQL.

4. Which data type is used to store a fixed-length character string?

- A. VARCHAR2
- B. CHAR
- C. NCHAR

D. CLOB

Answer (B): CHAR

CHAR is used to store fixed-length character strings in PL/SQL.

5. What is the purpose of the BLOB data type?

A. To store large text data

B. To store binary data

C. To store numeric data

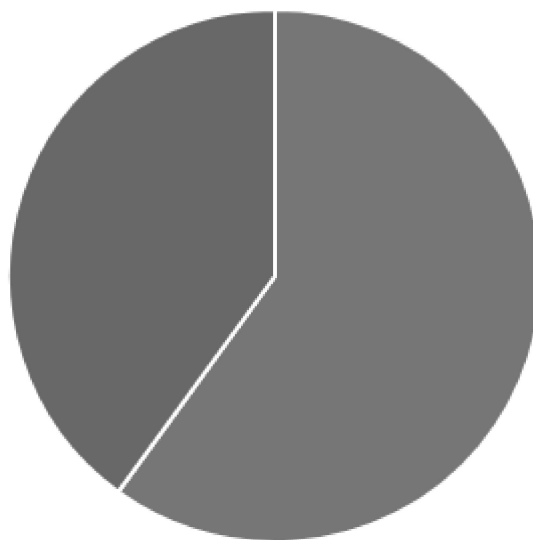

D. To store date values

Answer (B): To store binary data

BLOB (Binary Large Object) is used to store large amounts of binary data.

You scored 3 out of 5!
